

3600 S. Logan St.
Englewood, CO 80113

Dear All:

First and foremost, allow me to wish everyone a Happy and Prosperous New Year!

As most of you are aware, I am entering into a new medical practice involving bio-identical hormones. The focus is on natural testosterone delivered by implanted pellets that last 3-4 months!

Even though I am entering into a new practice arrangement, this is not new medicine to me. Personally, I have been studying this subject since 1999. For the past eight years, I have offered bio-identical hormones therapy to my plastic surgery patients by contracting with an outside independent physician. For the past year due to my own health concerns, I have been on testosterone pellet with amazing results.

Testosterone is made by your body for your body, both in males and females! After age 35 most everyone begins to experience an age related decline in their own natural testosterone levels. Public awareness is high with more marketing exposure aimed at the benefits of testosterone therapy. It is almost impossible not to hear a radio ad, see something in print, or a TV ad attesting to the importance of testosterone replacement therapy.

The symptoms that most men and women experience because of their declining levels of testosterone include many of the following complaints:

<i>Hot Flashes</i>	<i>Anxiety</i>	<i>Bone Loss</i>
<i>Night Sweats</i>	<i>Poor Exercise Tolerance</i>	<i>Dry Skin</i>
<i>Fatigue</i>	<i>Sugar Cravings</i>	<i>Thinning Skin</i>
<i>Low Libido</i>	<i>Panic Attacks</i>	<i>Foggy Thinking</i>
<i>Vaginal Dryness</i>	<i>Weight Gain/Difficulty</i>	<i>Joint Pain</i>
<i>Insomnia</i>	<i>Losing Weight</i>	<i>Water Retention</i>
<i>Irritability</i>	<i>Visual Changes</i>	<i>Hair Loss</i>
<i>Mood Swings</i>	<i>Panic Attacks</i>	<i>Erectile Dysfunction</i>
<i>Depression</i>	<i>Memory Lapses</i>	<i>Loss of Muscle Mass</i>

The good news is that many of the above symptoms will improve or even reverse with testosterone replacement therapy. Because testosterone is a natural hormone, all organ systems are beneficially affected, including cardiovascular, respiratory, musculoskeletal, skin, urological, etc!

Vitali-T Medical Clinics differs from most other treating clinics and/or physicians in three ways: the source and purity of the testosterone, the route of delivery, and safe medicine with predictable results. The testosterone needs to be identical to the molecular structure occurring naturally in our human

body. The testosterone pellet is compounded by a certified and state approved compounding pharmacy. The pellets are routinely tested by our compounding pharmacy for sterility and potency.

The best route of delivery is through implantable pellets which last 3-4 months! This allows for a constant, steady release similar to the natural release of testosterone in our body. The vast majority of other clinics use creams, pills, or IM injections on daily to weekly basis. This delivery is suboptimal because it creates a variable and uneven “up and down “pattern as the medication is absorbed. Testosterone pellets are inserted through a small nick in the skin in the posterior flank. This is a simple 2-4 minute sterile procedure with minimal down time.

HOW EXPENSIVE IS TESTOSTERONE PELLET THERAPY?

New pellets will need to be inserted 3-4 times per year. In the Denver area, the average yearly cost for testosterone pellet replacement therapy for women varies from \$2,900 to \$3,700. Because more testosterone is required for men, the cost for testosterone pellet therapy ranges from \$3,400 to \$3,999.

OUR SPECIAL OFFER TO FAMILY, FRIENDS, AND SPOUSES

Vitali-T Medical Clinic is offering family, friends, and spouses an exclusive offer...testosterone pellet therapy at the price of our 'cost of materials'. Our cost of materials includes cost of medication, supplies, shipping, sales tax, etc. Ramping up at an accelerated rate will ensure that we qualify for best rates and discounted prices from our vendors. The most effective marketing is word of mouth from a happy patient. I am confident that each of you will have positive results, and I am willing to gamble that many of you will be talking and sharing your experience with Vitali-T Medical Clinics with your family and close friends. This of course means more patients for Vitali-T Medical Clinics.

- **Our yearly rate for a woman is ~~\$3,200~~ **\$1,250****
- **Our yearly rate for a man is ~~\$3,600~~ **\$1,750****

Vitali-T Medical Clinics will honor your 'cost of material' special moving forward.

HOW TO QUALIFY FOR THIS SPECIAL OFFER

To enroll in the 'cost of material' program it's as simple as 1, 2, and 3.

1. Agreement to keep this special offer confidential

You are among a select few that are being offered the 'cost of material' program . For obvious reasons, we need your word to keep this special pricing confidential and not revealed to others.

2. Get your labs drawn

Attached to this email are printable male and female signed lab order forms that must be drawn prior to making an appointment with us. These labs can be obtained from any medical lab that is covered by your medical insurance. LabCorp is one of the areas largest. Please visit www.labcorp.com or call **888-522-2677** to verify that LabCorp will accept your

insurance and to find the closest patient service center. Please request that the labs are faxed to our fax number (as written on the order form 303-839-7936).

If you do not have medical insurance, call Affordable Labs at **303-432-7855** located in our office building (3600 S. Logan St. Englewood, CO).

3. Make an appointment with Vitali-T Medical Clinics

It takes about a week for us to receive your lab values. Please notify us at **720-425-9541** when you are getting your labs drawn, and schedule an appointment with us. At your consultation, a history and physical will be performed and your lab results discussed. If you so agree, a medical treatment plan will be custom planned for you and your testosterone pellet implantation will be scheduled.

I am excited to offer each of you this exclusive opportunity. I feel that this is a win/win for you and Vitali-T Medical Clinics. Remember that testosterone is made by your body for your body. Do not be age deprived of this essential life quality hormone.

With my warmest regards,

Stephen A. Goldstein, MD, FACS
Vitali-T Medical Clinics
Founder and Medical Director
